

IN THE CLAIMS:

The text of all pending claims, (including withdrawn claims) is set forth below for the Examiner's benefit. Cancelled and not entered claims are indicated with claim number and status only. The claims as listed below show added text with underlining and deleted text with ~~striketthrough~~. The status of each claim is indicated with one of (original), (currently amended), (cancelled), (withdrawn), (new), (previously presented), or (not entered).

Please AMEND claims 33-37 and CANCEL claims 25-32, without prejudice or disclaimer, in accordance with the following:

1-32. (Canceled)

33. (Currently Amended) An information storage medium for use with a reproducing apparatus providing a visual display of interactive graphics, the information storage medium comprising:

audio-visual (AV) data;

navigation data that is a set of navigation commands related to reproduction of the AV data; and

one or more interactive graphics streams which are used to control reproduction of audio-visual data and are reproduced with the audio-visual data, wherein one interactive graphics stream among the one or more interactive graphics streams is selected by attribute information in a player status register in the reproducing apparatus ~~a program that is executed to select the one interactive graphics stream used to control reproduction of the audio-visual data based on attribute information, and which is reproduced with the audio-visual data.~~

34. (Currently Amended) The information storage medium of claim 33, wherein the ~~attribute information comprises menu language information, viewer class information, sub-title language information, and audio language information~~ the one interactive graphics stream can be changed by navigation commands related to reproduction of the audio-visual data and cannot be changed by a user's operation.

35. (Currently Amended) An apparatus providing a visual display of interactive

graphics by selecting and reproducing one interactive graphics stream among one or more interactive graphics streams from an information storage medium, the apparatus comprising:

a processor which ~~loads and executes a program that selects the one interactive graphics stream among the one or more interactive graphics streams used to control reproduction of audio-visual data based on~~ obtains attribute information in a player status register in the apparatus; and

a decoder which reads and reproduces one of the interactive graphics streams corresponding to the obtained attribute information from among the one or more interactive graphics streams from the information storage medium, the one interactive graphics stream being used to control reproduction of audio-visual data and being reproduced ~~the one interactive graphics stream selected by the program with the audio-visual data.~~

36. (Currently Amended) The apparatus of claim 35, wherein ~~the processor obtains the attribute information by loading and executing the program and determining whether the one interactive graphics stream comprising the attribute information is present~~ the one interactive graphics stream can be changed by navigation commands related to reproduction of audio-visual data and cannot be changed by a user's operation.

37. (Currently Amended) The apparatus of claim 35, wherein ~~the processor program is a command included in~~ executes a program object comprised of navigation commands that is related to the audio-visual data to enable selection of the one interactive graphics stream.

38. (Previously Presented) The apparatus of claim 35, wherein the processor loads and executes an interactive graphics stream change program included in the one interactive graphics stream that is being reproduced and reads and reproduces another interactive graphics stream selected according to new attribute information obtained by executing the interactive graphics stream change program.

39. (Previously Presented) The apparatus of claim 38, wherein the interactive graphics stream change program is a button command included in a button object.

40. (Previously Presented) The apparatus of claim 36, wherein the attribute information includes menu language information, viewer class information, sub-title language

information, and audio language information.
